IN THE CLAIMS:

1. (Currently Amended) Fusion protein comprising a cellulose binding domain and a domain having a high binding affinity for another ligand, with chemical equilibrium constant K_D for binding between the domain having the high binding activity and the ligand being lower than 10^{-4}M,

wherein the domain having a high binding affinity is an antibody or antibody fragment and,

wherein the domain having a high binding affinity ~~is directed at~~ binds to one of the following: a ~~Benefit Agent~~ benefit agent~~, the fabric, a specific part of the fabric, and~~ or micro-particles which are loaded with a benefit agent.

2. (Currently Amended) Fusion protein according to claim 1, wherein the cellulose binding domain is obtained from a fungal enzyme isolated from fungi selected from the group consisting of origin ~~such as~~ *Humicola*, *Trichoderma*, *Thermomonospora*, *Phanerochaete*, *and Aspergillus* or from a bacterial enzyme isolated from bacteria origin such as selected from the group consisting of *Bacillus*, *Clostridium*, *Streptomyces*, *Cellulomonas* and *Pseudomonas*.

3. (Previously Amended) Fusion protein according to claim 1, wherein the cellulose binding domain is obtained from *Trichoderma reesei*.

4. Canceled.

5. (Currently Amended) Fusion protein according to claim 1, wherein the antibody is a ~~Heavy Chain~~ heavy chain antibody as found in Camelidae or obtained from V_h fragments by a camelization procedure.

6. Canceled.

7. Canceled.

8. (Currently Amended) Fusion protein according to claim 1, wherein ~~the domain having a high binding affinity is directed at a~~ the ~~Benefit Agent~~ benefit agent is selected from the group consisting of ~~a~~ fabric softening agents, fragrances, perfumes, polymeric lubricants, photoprotective agents, latexes, resins, dye fixative agents, encapsulated materials, antioxidants, insecticides, soil repelling agents ~~or a~~ and soil release agents.

9. (Canceled)

10. (Canceled)

11. (Canceled)

12. (Previously Amended) Fusion protein according to claim 1, wherein the cellulose binding domain is connected to the domain having a high binding affinity for another ligand by means of a linker consisting of 2-15 amino acids.

13. (Canceled)

14. (Currently Amended) Fusion protein according to claim 1, wherein antibody or the antibody fragment is ~~a~~ multi-specific ~~antibody or antibody fragment, whereby at least one specificity is directed to the fabric and the others are directed to one or more benefit agents~~.

15. (Original) Detergent composition comprising one or more surfactants and a fusion protein according to claim 1.

16. (Original) Process for delivering a benefit agent to a fabric by treating said fabric with a composition comprising a fusion protein according to claim 1 and a benefit agent selected from the group consisting of softening agents, finishing agents/protective agents, fragrances and bleaching agents.

17. (Previously Added) Fusion protein according to claim 1, wherein the cellulose binding domain is connected to the domain having a high binding affinity for another ligand by means of a linker consisting of 2-5 amino acids.
